Correction: The Role of Compensatory Mutations in the Emergence of Drug Resistance

Andreas Handel, Roland R. Regoes, Rustom Antia

In *PLoS Computational Biology*, volume 2, issue 10:

Equation 1 contained typographical errors in the first and last lines. The correct equation is as follows:

$$\dot{S} = \lambda N - \lambda S + \sum_{i=1}^{3} (\nu_i - \beta_i \frac{S}{N}) I_i$$

$$- \frac{S}{N}(\beta_s I_u + \beta_s I_t) + \nu_u I_u + \nu_t I_t$$

$$\dot{I}_u = (1-f)\frac{S}{N}\beta_s(I_u + I_t) - (\lambda + \nu_u)I_u$$

$$\dot{I}_t = f\frac{S}{N}\beta_s(I_u + I_t) - (\lambda + \nu_t + \mu_t)I_t$$

$$\dot{I}_1 = \mu_t I_t + (\frac{S}{N}\beta_1 - \lambda - \nu_1 - \mu_1)I_1$$

$$\dot{I}_2 = \mu_1 I_1 + (\frac{S}{N}\beta_2 - \lambda - \nu_2 - \mu_2)I_2$$

$$\dot{I}_3 = \mu_2 I_2 + (\frac{S}{N}\beta_3 - \lambda - \nu_3)I_3.$$
